QT15030 05 Radford 04-24-2017 edited JA BG.docx
Report Radford 05-04-2017.docx

Billy-Please upload these documents (comments & response to comments + final) to the record and generate a QA recommendation of “acceptable with minor revisions” for Brian. He was already provided with and responded to review comments and only needs review form.

Brian-the minor revisions recommendation is from original review, you have addressed QA concerns with these revisions.

Thx!

Libby,

Johanna has addressed your comments and we added an explanation at the beginning of the marked copy to indicate that this version is different than the one you received a couple weeks (?) back. If you still see some issues, no problem, please come by and see me so that I can understand firsthand.

Thanks!

Brian

Looking through the revision, as far as I can tell, none of the data in the tables changed. Can you or Johanna put a response to the comments in the edited version just explaining why no change was necessary so we can document why they don't need to be addressed?

Libby

Libby,

Here's a revised version. We've also changed this version to reflect comments by the sponsor of the work, so there may be quite a few changes. Maybe an additional table or column in a table as well as the expression of the emission factor units. Let me know if you have any questions.

Thank you!

Brian

I'm going to let you look over the comments and clarify discrepancies I'm seeing in the data in tables and appendices. Once we get the data matching up I can approve with minor revisions. Let me know if you have any questions. Thanks!
